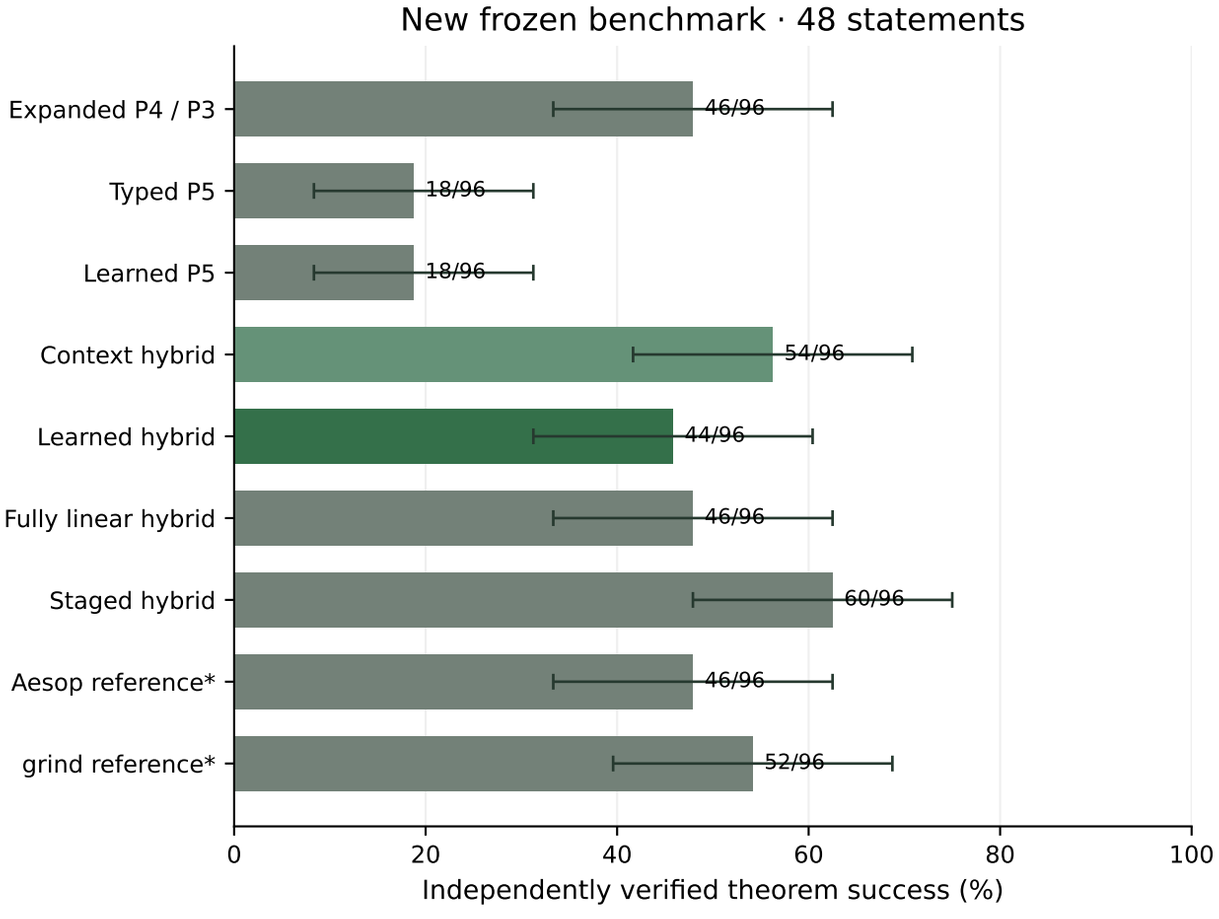
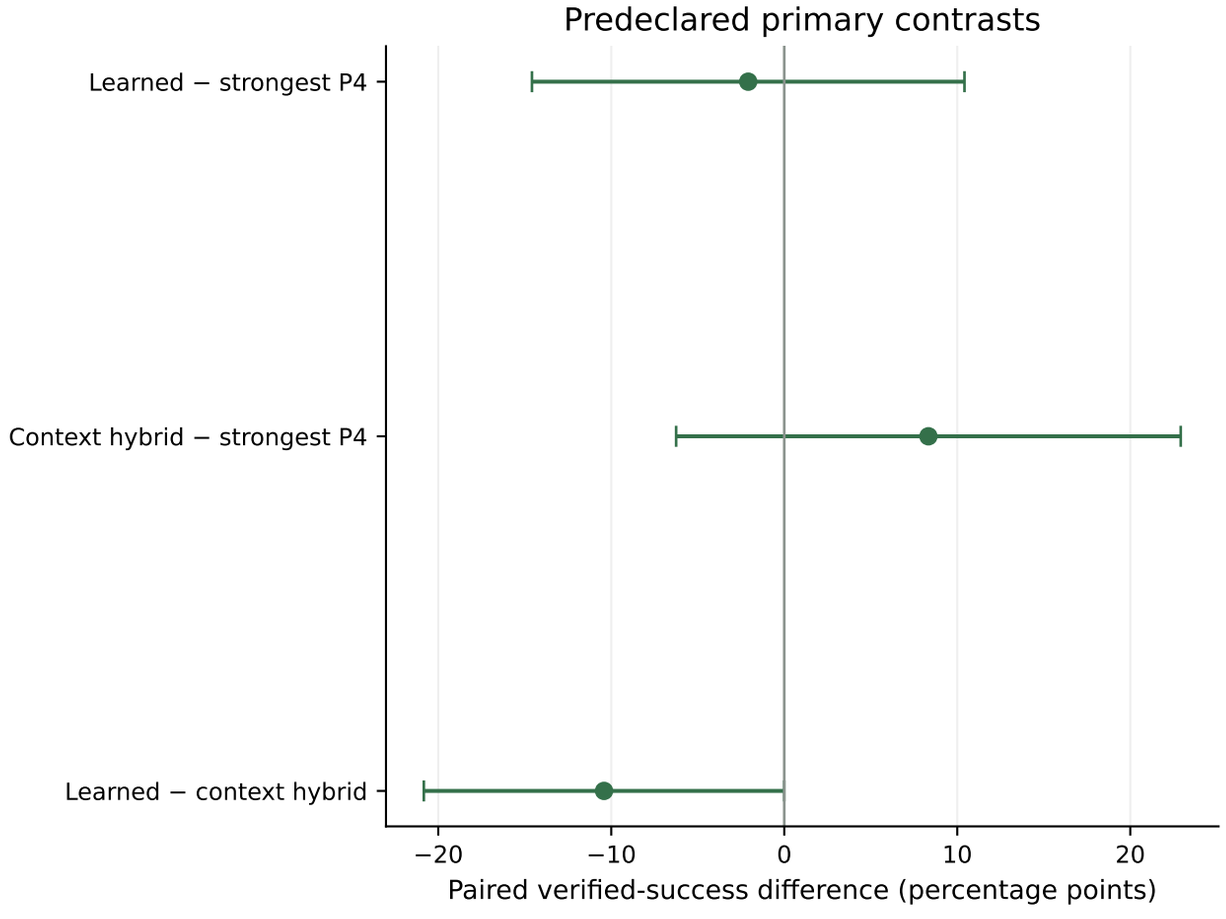
ProofLab Phase 6 · measured hybrid search





Bars: theorem-bootstrap 95% intervals. Paired contrasts use theorem repeat averages, 10,000 draws, seed 2718.
*External engines: one two-second call; internal work differs. ProofLab: cap 24, 600 attempts, 80 expansions, 18s engine budget.
Curated related mathematical families; success, symbolic expressiveness and learning effects must be interpreted separately.
